DETAILED ACTION

1. This Office Action is responsive to the RCE and IDS filed on 10/24/07. Accordingly, claims 1-28 are currently pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Sindhushayana et al (6,661,832), newly-cited.

-Regarding claim 19, Sindhushayana et al discloses a method (see figure 2) comprising:

procedure (comprising (78)) of receiving one or more output signals “s” from a detector (72) (see col. 8, lines 45-60);

procedure (comprising (100, 94)) of determining a factor outputted from (100), (the factor considered here equivalent with the limitation “normalization factor”), for each of the one or more output signals for multiplications in a multiplier (102), each factor being independent of factors for previous output symbols (see col. 10, lines 11-33);

procedure (78, 102, 46) of multiplying, via (78, 102), each of the one or more output signals by the corresponding normalization factor to obtain a metric, (said metric considered here equivalent with the limitation “metric correction”); and providing the metric correction for each symbol toward a channel decoder (DECODER) (see col. 6, lines 49-55, col. 10, lines 26-32).

Art Unit: 2611

-Regarding claim 20, Sindhushayana et al teaches that decoding a transmission using the metric correction (see col. 6, lines 49-55, col. 10, lines 26-32).

Allowable Subject Matter

4. Claims 1-18 and 24-28 are allowed.
5. Claims 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
